Field Day, NCCC Style

This past Field Day will surely go down in the history books! Even with a low solar flux, this was one of the hottest contests ever. We averaged 104/QSOs per hour... Err, ah, what I really meant to say was the temperature averaged 104 degrees! This was a scorcher of a day for everyone in California for sure.

We were up and running at the start of the gun signing WM2C. Though conditions were down over previous years, on some bands, the W2 call sign sure stirred up some activity on the west coast. We started off on 40, 20, 15, and 6 meters. 20m seemed to have the best rate throughout the afternoon. 40m was the nighttime band. 6 meters did have some activity, and we caught some Es openings as far north as VE7, and out west to the Colorado. While we had fun, the bands were in pretty bad shape, but that is to be expected at this time of the cycle.

After the initial surge of FD activity on the bands, the indoor rate dropped rapidly, but the QSO rate around the BBQ took a big jump! I guess Al's BBQ chicken created a pileup outside. I think Al was signing WR6R/We-Havechicken-6 to get all those people to flock outside and abandon the indoor pileups. As it always is, the BBQ was the center of attraction for our FD effort.

Lots of the gang stopped by to spend the afternoon. We did have a special visit from Brad, K6WR, our ARRL Pacific Section Manager. In addition, a few new faces attended, and I hope they will join the club. In total, over 500 QSOs were made. Not bad for only a few hours on the radios.

This wonderful Field Day could not have happened without the great hospitality of our host, Peggy Frazier. Thank you Peggy, for being you. Your continuing support of the club is dearly appreciated by everyone.

73,

Ken, WM2C

Contest Calendar

de K2MM

July 19	ARRL VHF/UHF Sprint
July 22-23	SEANET '95 CW
July 29-30	RSGB IOTA
July 29-30	Venezuela SSB DX
Aug 5-6	N. A. QSO Party, CW
Aug 5-6	YO DX Contest
Aug 5-6	ARRL UHF Contest
Aug 12-13	Maryland-DC QSO Party
Aug 12-13	New Mexico Chile Chase
Aug 19-20	N. A. QSO Party, SSB
Aug 19-20	European DX Contest, CW
Aug 19-20	SEANET '95 SSB
Aug 19-20	SARTG RTTY Contest
Aug 19-20	ARRL 10 GHz Contest
Aug 19-20	New Jersey QSO Party
Sept 2-3	All Asian SSB DX Contest
Sept 2-3	Bulgarian DX Contest
Sept 3	Panama XXIV Aniv. Contest
Sept 9-11	ARRL VHF Contest
Oct. 7-8	Calif QSO Party

Who says we're in the "off season" for contest activity? A quick look at the above list of summer activities makes me feel like the fall contest season is really used to relax after all the summer contests.

With no less than six (6) contests during the weekend of Aug 19-20 alone, I don't know which way to turn. Wouldn't it be great if all these contests had the same exchange? Then we could work anyone we hear, and send in a great score to all six contests! Imagine what that would do for your 5 meg scores... hi

de Al, AD6E

Directions and Map for Next Meeting

July, 21, 1995

W6QHS will be our keynote speaker for the July meeting. Dave will be discussing the recent move of the HC8A/HC8N contest station. As you know, this winning station was recently moved, and Dave will have lots of slides to show the new and improved setup. It's a sure bet there will be lots of neat things to learn at this one.

The July meeting will be held in the HP cafeteria on Steven's Creek Blvd. Pizza from "Give Pizza Chance" (W6OAT) will be available at 6:30, and the meeting begins at 7:30.

Of Special Note:

The August picnic has been set for Saturday, August 19, 1995. Jack, W1FEA has again offered his home for the picnic site. Details on all the hoopla will be in the August JUG.

Free food! Yep you heard it correct. Your prez would like assistance in finding other locations around the Bay Area to hold the NCCC meeting. If you submit a location (meeting hall, restaurant, or other suitable place) that is used for a club meeting, I will treat you to that evenings meal! de Ken, WM2C

John's Jottings

STAY, ROVER, STAY!

Though I've done plenty of VHF-contest mountain-topping before, last June's VHF QSO Party was my first experience as a rover. I was very glad to accept an invitation from Dave Curtis, NG0X, to cruise a few California grids in his porcupine van. We had a terrific time!

Dave outfitted his van with six antennas: a horizontal loop on 6m, a loop and a yagi on 2m, yagis on 432 and 1296, and a 2m/440 vertical for FM. All the antennas were fixed to the roof. The theory was to drive the van to point it in the right direction. In practice, it didn't work very well —the places we parked didn't have much maneuvering room, and both ops were occupied working stations leaving nobody to steer the van!

Dave is now working on plans for some kind of tilt-over mast with shorter antennas. The key features are to include mechanical ruggedness while travelling and fast and easy put-up and take-down. It may turn out that the most practical rotator is the Armstrong method — cheap, reliable, plus it's easy to turn the antenna quickly.

I was very interested to see how the new rover rules affected the roving strategy. Previously, all the Qs and all the mults from the different grids were added up separately, then multiplied together. This meant each Q was leveraged by all the mults, and each mult by all the Qs. Under the new rules, Qs and mults from each grid are totalled and multiplied separately, then scores from all the grids are added. This means that it's not worth roving to a new grid unless you're going to get enough mults to make your Qs worth something.

It turned out that the highest claimed rover score came from WB9AJZ/6 who operated almost entirely from CM86 — a grid that's all water except for a very small corner that includes Santa Cruz. AJZ made a few token Qs from other grids on his way home to qualify as a rover, and he ended up with a score 75% higher than the next-nearest rover. Seems pretty clear that the new rules are very broken because they encourage rovers to stay put instead of roving!

Other NCCC'ers participating in the contest include

Walt/AJ6T, Robert/N7STU, Don/N6IPE, Tim/NU6S, John/KG6I, Bruce/N6TU, Kit/W6ISO, Dick/W6KH, Steve/WA8LLY, and Louese/KA6ING.

INTERNET FIELD-DAY CHALLENGE

Tony/AE0M has been drumming up interest on the Internet for a piggy-back Field Day contest called the Internet Field Day Challenge (IFDC). Scoring in this contest includes section multipliers so that the strategy is more interesting than just running Qs. Tony is administering the contest, and Dave/W6QHS is sponsoring the prizes. Tony has just extended the log deadline by popular demand to July 15. He has promised to post preliminary scores by this weekend, so e-mail him your IFDC logs ASAP!

TWO CW SPRINTS IN JULY!

The eighth running of the Internet Sprint will be held on July 23 from 0100 to 0300Z. (That's 6-8 PM Saturday local time.) Band are 20 and 40m (CW only), and power is limited to 150 W. Exchange is number, name, and state, but the name you give is the name you got in the previous QSO! (You can pick your own starting name and hear it get mangled as it's passed along!) Dupes are allowed, but only after you've worked three other stations. If you've had trouble in the past with dupes, or if you don't like either computer logging or dupe sheets, then this contest is for you! Logs must be sent within 72 hours to n6tr@cmicro.com, and results are usually published within two weeks. Such a deal!

The first-ever running of the Asia-Pacific Sprint will be held July 16 from 1230 to 1430Z. (That's 5:30 to 7:30 AM Sunday morning. Yawn!) Bands, mode, and power are the same as the Internet Sprint. Exchange is RST plus serial number, and stations may be worked only once per band. Stations worked must be along the Pacific Rim from ZL/VK/YB up to 180 degrees. Prizes include T-shirts! Send logs by e-mail to 9v1yc@equator.lugs.po.my or by snail-mail to James Brooks, 15 Balmoral Road #03-08, Singapore 1025. For complete rules plus a list of Asia-Pacific prefixes, send e-mail to:

info-contest@dumpty.nal.go.jp with the command "#get ap-sprint.rule" in the message body.

Remember: As in all other Sprints, once someone answers your CQ, it's his frequency and it's your turn to QSY.

de K2MM

Best radio for under \$2,000 ?

The following was taken from the Contest Reflector on Internet -ed

Well, now that the replies have slowed to a trickle...thanks to everyone who responded to my question concerning the best \$2,000 radio for contesting! By popular demand, I submit the following compilation of responses:

First, here's how everyone voted:

	FT990	TS850	OMNI	IC736	IC765	FT1000
K0GU						X
K1KP				X		
N0BIW		X				
AA4V						X
KA9FOX				X		
WN3K	X or X					
K1BV	X					
WQ5G			X			
N4DVW	X					
K8CV			X			
K5ZD					X	
WX0B						X
K8DO			X			
N3BDA				X		
AI7B	X					
WT2G			X			
Totals	3.5	1.5	4	1	3	3

Bob Wilson, N6TV included a listing of the pros and cons of each of the currently available rigs:

TS-850	Pro	Con
Solid Receiver		Inconvenient Filters
Good SW support (TR-log)		No RIT clear
Small, compact size		Needs RS-232 interface
No separate RX ant.		Fair QSK

FT-990

Nice control layout	Unusable QSK
Nice controls/display	Hissy receiver audio
Supports sep. RX ant	Needs RS-232 interface

Omni-VI

Very light weight	Clunky controls
Excellent receiver/filters	No RIT clear button
Built-in RS-232 conn.	Requires external 12V
Supports separate RX ant.	No antenna tuner
Superior QSK	

FIVE MILLION POINT AWARD RULES

The 5 Meg award has generated a lot of interest since it started in July '86. From time to time, the rules and standings will be published in the JUG. Any questions about the rules, or of any points totals should be addressed to the VP/CC and/or AD6E.

PURPOSE:

This award is intended to give recognition for sustained efforts by NCCC members. All too often club members compete with moderate stations, year-in and year-out without a reasonable chance to win major awards. The Five Million Point Award is designed to rectify this situation. This award will be issued on a once per person basis.

HOW TO ENTER:

First you must actually enter a contest by submitting a valid entry to the sponsoring organization.

All operation must be from within "club territory" which is anywhere within northern California, and the Reno, NV area. Helping out at one of the NCCC super stations is perfectly allowable (and encouraged!). See Rule #5.

Send a copy of your Summary Sheet to VP/CC; K2MM. In the case of contests where NCCC is making a club entry, two summary sheets should be submitted. One sheet for the club entry and a second marked "Five Million Point Award".

(I also accept scores from Internet or DXPSN but that isn't always reliable. Be sure to send summary sheets to the VP/CC! de Al, AD6E)

5 MEG RULES:

1. This award requires the accumulation of five million points.
2. Point totals shall be accrued by the VPCC from copies of Summary Sheets which the contestant has submitted a valid contest entry.
3. Any contest entry may be used for submission as long as the entrant is competing from within NCCC territory.
4. It is not necessary for the NCCC to be participating as a club for your point totals to count towards this award.
5. Participation with a Multi Multi or Multi Single station can count for this award. To calculate your portion for this award, divide the total score by total number of operators. Submit a copy of the summary sheet claiming that portion of the effort.

One of several competitive Field Day efforts, these photos are from the 1A entry by AA6KX and AA6MC - Ed

Field Day 1995—the hottest day of the year, at 107 degrees, and here we are broiling in the sun after the wind shredded our tarp. Located right on the San Francisco/Sacramento Valley sectionline and operating as Class 1B, we scored 5128 points with 76 sections in the log. (Where was VY1JA when we needed him?) High point of the trip: the big Sunday morning pile-ups on 15. Low point: having to make VHF QSO #11 to call AAA to tow our stuck truck back onto the road.

—AA6MC/AA6KX

Ready for CQP? Now's the time to plan ahead and be ready. That's Mt. Shasta in the background at this super location I've lined up for CQP '95. This spot is at about 5000' and right on a county line. A score of 176K from here should be good enough for 2 new county records. I've got my spot...have you got yours yet?

de AA6KX

The following was picked off the Internet by N6TV:

—To contest, or not to contest,—that is the question: Whether 'tis nobler in the mind, to operate the Sprint or the PA QSO party is an outrageous question. Or is it better to take arms against a contest you do not enter, and by opposing them end them? To die, to sleep,—Contesting no more; insanity, and by dying to say we end the heart-ache of bad conditions, and the thousand natural shocks that contesters are heir to?—'tis a consummation devoutly to be wish'ed. To die, to sleep;—To sleep is to be wished, perchance to dream;—ay, there's the rub; For in that sleep what dreams may come. When we have undergone Morpheus' spell and shuffled off our daily toil, Contests dance in our heads: mighty Prometheus, after fire, gave the world contests. Let a smile cross your lips, for in the end, there are multitudes of paths, to the top of contest mountain.
